

ALUMINUM CANTILEVER GATES

- ✔ ZERO WAIT TIME
- ✔ ZERO HANDLING COSTS
- ✔ ZERO FRUSTRATION

ARMA Gates are engineered specifically for industry to guarantee safety and confidence for high cycle entry points.

**HIGH SECURITY
CONTROLLED
ENTRY SYSTEMS**

**ARMA GATE DISTRIBUTED
EXCLUSIVELY BY:**

ARMA Gate is the latest in high security controlled entry systems by Secure Orbit Inc.

ARMA Gate is manufactured in segments, lowering transportation cost and simplifying installation. The Game Changer is our patent, precision splice technology.

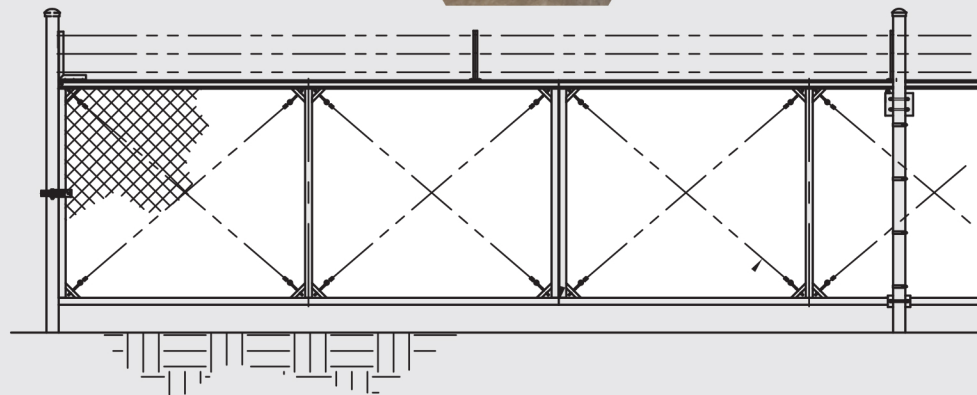

WHY CHOOSE A SEGMENTED ALUMINUM CANTILEVER GATE

- ✓ **LOW DEFLECTION**
Heavy wall aluminum alloy segments are designed for minimal wind deflection.
- ✓ **INEXPENSIVE TO SHIP**
ARMA Gate's segmented design reduces transportation cost & eases transportation to the job site.
- ✓ **SHIPS NEXT DAY**
Our gates are always in stock and ship within 24 hours.
- ✓ **FIT ANY OPENING**
ARMA Gate's segmented design can be configured to fit any opening. No custom orders required. ARMA Gate exceeds industry standards and is automation ready.
- ✓ **EASY MAINTENANCE**
Should your ARMA Gate require repairs or replacement, damaged areas can be exchanged for new segments without changing the entire gate.

“ It's not a matter of if it gets hit; it's a matter of when it gets hit. Obviously when the gate gets damaged they have to come out of service. The ARMA Gate itself has sections built into it so that the sections can be replaced which effectively creates less downtime for our gates and operations and still maintains the security of our yards.

- James Sullivan,
ERB Transport
