

SmartWeld[®]

70% stronger welds than traditional MIG method.

Corner Plate

Reinforcing corner plates deliver a truly robust frame.

Consistent Wind Resistance

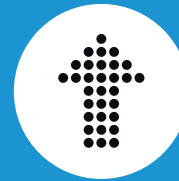

Both lightweight and heavy duty panels have improved wind resistance with ZND base weights and ZND Stabilizer systems.

Compatible

With similar diameters ZND stands and couplers are compatible with chainlink.

ZND's Unique Panel Solutions

The uniquely engineered ZND Panel mesh is welded to the frame at every point of contact. Over one hundred welds provide a robust panel and ensures great rigidity allowing the panels to be much lighter. ZND offers options: a lightweight panel and a heavy duty panel; always the same tube diameter: a true 1 3/8".

ZND offers options in the fencing space:

Heavy Duty Panels

Made for resilience.

ST612V-STANDARD (AC)
51 LBS

ST612V-EASY CARRY
44 LBS

Anticlimb Mesh

The small aperture makes the ZND panel resistant to climbing

Easy Carry Mesh

The wider aperture makes the ZND panel easier to handle

ST612.LW-STANDARD (AC)
31 LBS

ST612.LW-EASY CARRY
28 LBS

Lightweight Panels

Ergonomic and sustainable.

Options for Panel Weight

Heavy Duty – made for resilience

- Weight in line with industry standard
- Greater wall thickness than the lightweight frame
- Thicker wire gauge than the lightweight
- Robust frame, able to withstand punishing use

Lightweight – ergonomic and sustainable

- The lightest high quality panel in the US
- One person handling possible
- Lower fuel consumption while shipping
- A true 1 1/8" tube diameter
- Less steel and lower carbon footprint
- More economical compared to Heavy Duty

Choosing the right panel for you

Our latest panels are available in all varieties. Find the right panel to suit your requirements in **5 simple steps**.

1 Choose the Frame Style

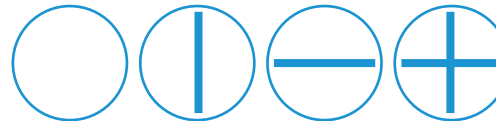

Square top Round top

2 Choose the Height

6 Foot 8 Foot

3 Choose the Support Tube Style

None Vertical Horizontal Vertical & Horizontal

4 Choose the Weight

Lightweight Heavy Duty

5 Choose the Mesh Style

Standard Anticlimb Easy Carry

Options for Panel Mesh

NARROW APERTURE PREVENTS CLIMBING

Anticlimb – our standard mesh

- Great aesthetics
- Climb resistant
- Increased security

Easy Carry – NEW mesh style

- Great aesthetics
- Easy to grab and carry
- More economical compared to Anticlimb
- Easy Carry is ideal when using privacy screen

WIDER APERTURE ALLOWS HAND TO FIT BETWEEN WIRES

Stand and Coupler not included
